Preface

Everlasting Iron Works was founded in the early 1990's by its entrepreneurial Director Anthony Anagnostou.

From the beginning, Anthony's main goal was producing "*the highest quality products that everyone can afford*". We have stayed true to this philosophy through our evolution as a company which is now one of Australia's largest wrought iron manufacturers.

Our aim is to provide you with high quality local components, made by skilled local labour, in our manufacturing and fabrication facility in Keilor East. When you buy ready made components from **Everlasting Iron Works**, you can ensure they will not be cheap, light imitations from overseas, but rather high quality local components made from local steel.

Due to our large factory setup, and countless machines providing automation, we have the ability to manufacture balustrade, gate and fence components for other manufacturers at extremely competitive rates. Often, we have found in the past that once a wrought iron fabricator calculates the REAL cost of producing components such as scrolls or balustrade panels, including the material cost, labour cost, time wasting cost, services and tool wear costs, they quickly decide that it's far more cost effective to let **Everlasting Iron Works** provide individual components in speedy turnaround times.

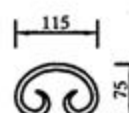

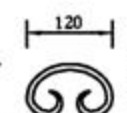

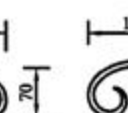

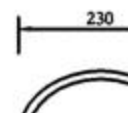

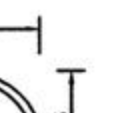

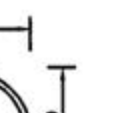

Talk to us soon about your particular needs, regardless of how specific they are, or how custom your components may be, we think that you'll be convinced we are a highly competitive alternative...

Custom Components

Everlasting Iron Works can provide full custom parts for your specific needs as a manufacturer. We can achieve this due to the fact that ALL components are manufactured in our factory, right here in AUSTRALIA, at highly competitive prices. This means that if you have a particular specific need in ironworks, **Everlasting Iron Works** is the only component manufacturer you need.

If you need a custom component made, simply:

- Ring us to discuss the part design and quantity
- Send us an accurate drawing of the required part
- Make an order and receive your parts promptly after ordering

For example, if ordering a custom equal scroll...

Baluster Inserts

Everlasting Iron Works has a full range of ready made baluster inserts to instantly fit into any custom work you may produce. Our balusters are fabricated to a generous **1000mm** long as **STANDARD**, allowing you to easily integrate into any level or rake balustrading.

Of course, as always at Everlasting Iron Works we can **CUSTOMISE** the **length** of any **balustrading insert** to your specific needs. Give us a call to discuss the endless options.

The following pages shows our standard range of baluster inserts. You can use the legend below as a guide to what options are available as standard.
